

Splice Trays and Storage Baskets for FOSC-400 and FOSC-450 Splice Closures

Description

FOSC splicing trays store fibers and splices in FOSC splice closures and any network element that accepts FOSC trays. In all parts of the tray, the arrangement of fiber and splices conforms to minimum bend radius requirements. The trays' hinged feature provides fiber protection as well as easy access.

Two tray layouts are available: One with splice modules in the center of the tray; one with the splices at the exterior.

Storage baskets are available for slack storage of extra or uncut fiber lengths.
